Art Unit: 1793

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to a gypsum board + tartaric acid/salt.

Group II, claim(s) 11-22, drawn to a process for making gypsum board with reduced sagging by adding or combining tartaric acid/salt + boric acid/salt.

Group III, claim 23, drawn to a method of using tartaric acid/salt for reducing sagging.

The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1 is anticipated or obvious over GB 1,226,333 (Third Party Provided Reference that can be found on Public Pair). GB 1,226,333 teaches a cast gypsum plaster article which is inclusive of boards that teaches adding tartaric acid in the amount of 0.005 to 0.2 wt% thus anticipating applicants' instant claim 1 (see col.2, second paragraph). Note that applicant's claim 1 only requires tartaric acid (the second portion of claim requires both tartaric acid and boric acid to reduce sagging). As the recited structure does not make a contribution over the prior art, unity of invention is lacking and restriction is appropriate.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
